

# ARTIFICIAL INTELLIGENCE: How the Artificial Intelligence revolution is reshaping our lives

Artificial Intelligence is not just robots. It lies at the heart of a whole host of different technologies, reshaping the way we lead our lives.

## Artificial Intelligence makes everyone's lives easier

### SMART HOME DEVICES

Smart home devices volume will grow from 83 million in 2015 to 193 million in 2020

Internet-connected fridges order groceries for you

### SOCIAL MEDIA CURATION

With over 2 billion social media users, Artificial Intelligence filters complex information to help prioritise interactions

### NEWS GENERATION

First Artificial Intelligence-written article published 2015, with Artificial Intelligence now playing critical role in generating news

### VOICE BASED ASSISTANTS

### MUSIC & MOVIE RECOMMENDATION

Thousands of programmes use Artificial Intelligence to help you discover more of the content you love

## Paving the way for faster economic growth

Around **50 billion objects**

will be connected to the internet of things by 2020

**\$0.6**  
BILLION

ARTIFICIAL INTELLIGENCE REVENUE

**\$37**  
BILLION

2016

2025

Through more efficiency and innovation Artificial Intelligence could **double the economic growth rates** of many advanced countries by 2035

Investing involves risk. The value of an investment and the income from it may fall as well as rise and investors might not get back the full amount invested.

Investing in fixed income instruments may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including short positions with respect to fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values of these instruments are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions. Past performance is not a reliable indicator of future results. If the currency in which the past performance is displayed differs from the currency of the country in which the investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency. The views and opinions expressed herein, which are subject to change without notice, are those of the issuer companies at the time of publication. The data used is derived from various sources, and assumed to be correct and reliable, but it has not been independently verified; its accuracy or completeness is not guaranteed and no liability is assumed for any direct or consequential losses arising from its use, unless caused by gross negligence or wilful misconduct. The conditions of any underlying offer or contract that may have been, or will be, made or concluded, shall prevail.
